

Ever since the second volume/issue of this book, I have made a plea for assistance in identifying cards. Many have since been ID'd, but there are still some that I just can not get anything concrete on, and in some cases, I have no info at all on them. Please take some time and look these over. If you have ANY information or tidbits on any of them, please pass it along. Thanks as always.

#1) These have been haunting me since before I even started compiling info on promos. I have NOTHING on either card. I've pictured these in almost every edition and still got bupkis. The backs are identical and shown below.
